

## **Siskiyou Velo Club Guidelines on Electric Bikes**

Riders who choose to ride e-bikes must bring only two- or three-wheel e-bikes that comply with the following:

- 1) The e-bike is equipped with a motor that generates 750 Watts or less, provides assistance only when the rider is pedaling, and ceases to provide assistance at 20 mph (class 1 e-bike)
- 2) The e-bike is equipped with a motor that generates 750 Watts or less, provides assistance only when the rider is pedaling, and ceases to provide assistance at 28 mph (class 3 e-bike)

Class 2 e-bikes, which can be propelled solely by a throttle-controlled motor (without pedal assistance), are not allowed on club rides.

As are all bike riders, e-bike riders are asked to ride safely and courteously, taking into account the intended speed range announced by the ride leader.
